PROFESSIONAL SUMMARY

DevOps & Cloud Engineer with 7+ years of hands-on experience across AWS, Azure, and GCP in enterprise-scale environments. Expertise in infrastructure as code, CI/CD automation, container orchestration, monitoring, and cloud migration. Skilled in leveraging tools such as Terraform, Jenkins, Kubernetes, Ansible, and Docker to streamline software delivery and ensure system resilience.

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer

AIRBUS (Product Based), Bengaluru — Feb 2023 – Present

- Migrated legacy infrastructure to **AWS** using scalable **IaC** solutions via **Terraform** and **CloudFormation**.
- Designed **AWS**-based cloud architecture for a **Node.js** & **Java** application, focusing on scalability and performance.
- Established end-to-end **CI/CD** pipelines for **NPM** & **Java** applications, ensuring automated builds and deployments.
- Architected serverless infrastructure leveraging **AWS Lambda**, **ECS Fargate**, **Glue**, **API Gateway**, **EventBridge**, **Step Functions**, **S3**, and **DynamoDB** to support highly scalable, event-driven workloads with minimal operational overhead.
- Implemented Infrastructure as Code using **Terraform** and **CloudFormation** to automate deployment of scalable, event-driven, three-tier architectures on **AWS** — provisioning services such as **ECS Fargate**, **RDS**, **DynamoDB**, **API Gateway**, **Lambda**, **SNS**, **SQS**, **CloudWatch**, **Cognito**, **CloudFront**, **Application Load Balancer (ALB)**, and **Route 53**.
- Developed **Docker** images and integrated them into **Jenkins** and **Artifactory**, pushing images to **Amazon ECR** for seamless deployment.
- Provided expert guidance on **DevOps** best practices to stakeholders and vendors, optimizing project workflows and efficiency.
- Produced comprehensive **DevOps** documentation ensuring clarity and continuity in operations on **Confluence**.
- Built scalable automation for **ECS/EKS**-based microservices, handling **Docker** image lifecycle, **blue-green deployments**, and **DB migrations**; drove operational efficiency by building reusable **Ansible** roles for provisioning, patching, and compliance enforcement.
- Built automated deployment pipelines for containerized microservices running on **ECS** and **EKS**, integrating database migrations, **Docker** image builds, and **ECR** publishing to enable scalable, zero-downtime releases via **Jenkins** and **GitLab CI**.

- Built and maintained **100+** microservices across **Dev**, **QA**, and **Prod** environments by deploying scalable containerized workloads using **Amazon EKS**, **ECS**, and transitioning legacy systems from **OpenShift**, all integrated with robust **CI/CD** automation.
- Integrated a comprehensive observability stack across distributed microservices using **Prometheus** for metrics collection, **Grafana** and **Loki** for dashboarding and log aggregation, **ELK Stack** and **Splunk** for centralized logging and analytics, **Jaeger** for distributed tracing, and **Datadog/New Relic** for infrastructure and **APM** monitoring — enabling real-time alerting, root cause analysis, and system-wide visibility across **EKS** and **ECS** workloads.
- Developed **Python** automation scripts for cloud operations, including **AWS** resource provisioning, **Lambda** packaging, cost monitoring, and automated backup/cleanup jobs across accounts.
- Wrote modular **Bash** and **Shell** scripts to automate **CI/CD** tasks, build orchestration, log parsing, and deployment hooks across **Jenkins** and **GitLab CI** pipelines.

Senior DevOps Engineer

IBM India (GBS Unit), Bengaluru — Jul 2021 – Jan 2023

- Deployed scalable and production-ready infrastructure on AWS using **EKS**, **Terraform**, and **GitLab CI/CD**, supporting multiple microservices across dev, QA, and prod environments.
- Implemented **Blue-Green** and **Canary deployment strategies** using **Harness** and **Spinnaker**, enabling safe and automated application rollouts with reduced downtime risk.
- Automated workflows and system operations using **Shell** and **Python scripts**, including build packaging, log analysis, and deployment validation tasks.
- Managed **Kafka** and **RabbitMQ** message queues for asynchronous communication across distributed systems, ensuring high reliability and performance.
- Integrated and maintained centralized logging and monitoring using **Splunk** and **ELK Stack**, improving incident response and reducing mean time to resolution (MTTR).
- Assisted in resolving infrastructure-related escalations and supported on-call rotations, contributing to improved **SLA adherence** and **environment stability**.

Senior Software Engineer – DevOps & Cloud

GLOBALLOGIC (Hitachi Group), Noida — Nov 2020 – Jul 2021

- Deployed and managed Kubernetes clusters on **Google Kubernetes Engine (GKE)**, authored **Helm charts**, and configured **Kong Ingress Gateway** for secure service routing.
- Automated CI/CD pipelines using **GitLab CI/CD** and **Google Cloud Build**, integrating with **GCR** and **Artifact Registry** for container lifecycle management.
- Implemented **Harness** pipelines with Blue-Green and Canary deployments to support controlled application rollouts across Dev to Prod.
- Integrated **GCP Pub/Sub** for event-driven automation and leveraged **Secret Manager** and **IAM** for secure configuration and access control.

- Built real-time monitoring dashboards using **ELK Stack**, **Splunk**, and **Cloud Monitoring**, reducing MTTR through unified observability.

System Administrator – Cloud & DevOps

NTT DATA (formerly Dell Services), Bengaluru — Oct 2017 – Dec 2019

- Managed foundational **AWS** services including **EC2**, **RDS**, **VPC**, **Route 53**, and **Auto Scaling Groups**, supporting cloud infrastructure for enterprise clients.
- Automated infrastructure provisioning, configuration management, and OS patching using **Ansible** and **Python/Bash/Shell scripts**, reducing manual effort and improving consistency.
- Built and maintained **Terraform** templates for provisioning resources across **AWS**, **Azure**, and **GCP**, gaining early multi-cloud infrastructure experience.
- Developed and deployed CI/CD pipelines using **Azure DevOps** and **Google Cloud Build**, enabling basic automation for internal tools and sandbox environments.
- Supported 24/7 production operations via **BMC Remedy** and **ServiceNow**, resolving incidents and fulfilling infrastructure change requests under tight SLAs.

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate (2025)**
- **AWS Certified SysOps Administrator – Associate (2022)**
- **AWS Certified Cloud Practitioner (2021)**
- **Microsoft Azure Fundamentals (AZ-900) (2021)**
- **EMC Storage Certified (2018)**

TECHNICAL SKILLS

Cloud Platforms:

Amazon Web Services (EKS, ECS Fargate, Lambda, EC2, S3, RDS, VPC, CloudFront, Route 53, IAM, CloudWatch, Secrets Manager, EventBridge, Step Functions), Microsoft Azure (AKS, VMs, Blob Storage, Azure DevOps), Google Cloud Platform (GKE, Cloud Build, Pub/Sub, GCR, IAM, Secret Manager)

Containerization & Orchestration:

Docker, Kubernetes, Helm, OpenShift, ECS, EKS, GKE, Kong Ingress Controller

CI/CD & Release Automation:

Jenkins, GitLab CI, CloudBees Jenkins, Harness, Spinnaker, Argo CD, Azure DevOps, Google Cloud Build

Infrastructure as Code (IaC):

Terraform, CloudFormation, Ansible, Packer

Scripting & Automation:

Python, Bash, Shell scripting, YAML, JSON

Monitoring, Logging & Observability:

Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Loki, Jaeger, Datadog, New Relic, Splunk, OpenTelemetry

Artifact & Package Management:

JFrog Artifactory, Nexus, DockerHub, Amazon ECR, Google Artifact Registry

Version Control & Source Code Management:

GitHub, GitLab, Bitbucket

DevSecOps & Policy as Code:

SonarQube, Checkov, Open Policy Agent (OPA), Rego, Snyk, AWS Config

Web & Application Servers:

Nginx, Apache HTTP Server, Tomcat

Project Management & ITSM Tools:

Jira, Confluence, ServiceNow, BMC Remedy, VersionOne

EDUCATION**Master of Business Administration (MBA), Business Management**

Narsee Monjee Institute of Management Studies (NMIMS), Mumbai — 2021

Bachelor of Technology (B.Tech), Information Technology

Dr. A.P.J. Abdul Kalam Technical University, Lucknow — 2017

Graduated with 75.18%
